

DIY ANT PUPPET

Make your own puppet using simple stuff!
by WonderSpark Puppets

Materials Needed

- Egg carton
- 2 Pipe cleaners
- Heavy duty tape
- Markers or googly eyes

Instructions

Cut out 3 segments from the egg carton, making sure that they are together (they should not be cut apart).

PIPE CLEANERS

- Cut one pipe cleaner into 6 leg lengths (leave extra for the inside).
- Cut the other pipe cleaner into 2 antennae pieces and one long handle piece.

LEGS

- Poke 6 holes in the side of the egg carton segments (these will be for legs).
- Insert the pipe cleaner pieces through the leg holes and tape them on the inside.
- Bend the pipe cleaners so that the legs can balance.

HEAD

- Poke 2 holes on the 'head' segment for antennae.
- Insert the two pipe cleaner pieces into the head holes and tape them on the inside.
- Twist the pipe cleaners into antennae shapes.
- Add Googly eyes or draw on a face.

BODY

- Poke 1 hole on top of each 'body' segment for the handle.
- Insert the long pipe cleaner handle piece through the body holes and tape them on the inside.

Now it's time to decorate! Make your Ant Puppet any color you like.

What is your Ant's name? What do they like to do?
