

WonderSpark Puppets

Technical Requirements

Puppet show length: 45 minutes
After show activity (*optional*): 15-20 minutes

Entire performance takes place within a puppet booth (6' high x 4' wide x 4' deep)
Pre-show speech by performer in front of stage

Audio Needs

- Headset mic and Sennheiser receiver provided by performer, outputs to XLR
- iPod controlling music is in puppet booth, outputs to 1/8"

Lighting Needs

- Puppet booth has lights on it (controlled by performer)
- One power outlet / extension cord needed to reach puppet booth lights
- Just one stage light from venue needed, focused on center of booth

Stage Needs (if possible)

- House lights up at top of show, after pre-show speech transition to just one stage light
- At ending of show, transition back to house lights

Space Needs (optional)

- Workshop can take place on stage, in audience seating area or any floor space
- One area should be designated for meet-and-greet / photo opportunities with audience

Dressing Room / Green Room

The performer requests a secure, clean, and non-smoking dressing room with a private bathroom near the performance area for changing and storage of personal items.

Public bathrooms and storage rooms are not acceptable dressing rooms.

Stage Manager varies by performance
