

Puppet theater combines art, movement, drama and interaction!

Our highly skilled teaching artists will bring fun and laughter to your online learning schedule.

We can stream weekly or individual sessions that can incorporate and enhance your school's virtual learning curriculum. Our sessions can run 15, 30 or 60 minutes and can either be streaming live or prerecorded (your choice).

We are here to help! We are flexible and have been streaming every day since March 2020 - our team are online streaming pros!

Older children will build their own puppets and perform, while younger kids will make DIY crafts and watch hilarious puppet shows. We will learn about different cultures and art throughout the world, and make all kinds of different styles of puppets.
